## LESSON 1: PREPARING CONSTRUCTION MATERIALS AND TOOLS

**Demonstrate understanding of:**

- Types and uses of construction materials
- Kinds of carpentry tools
- Description of materials and tools
- Listing of materials as per company standards.

<tr>
<td>LO1. Identify materials and tools applicable for a specific construction job.</td>
<td>1. Tools and materials are identified as per job requirements. 2. Tools are classified according to their functions per job requirements. 3. Materials are classified according to their uses in a specific construction project. 4. Tools and materials are selected per job requirement.</td>
<td>LO1. Identify materials and tools applicable for a specific construction job.</td>
<td>1. Enumerating and describing the tools and materials used in carpentry works.</td>
<td>• Written test  • Performance test</td>
<td>6 hours</td>
</tr>
<tr>
<td>LO2. Request appropriate materials and tools.</td>
<td>1. Needed materials and tools are listed as per job requirement. 2. Materials and tools are requested according to the list prepared. 3. Requests are done as per company’s standard operating procedures (SOP). 4. Materials and tools are substituted and provided for unavailable ones without sacrificing cost and quality of work.</td>
<td>LO2. Request appropriate materials and tools.</td>
<td>1. Fill up necessary forms as per job requirement.</td>
<td>• Written test  • Performance test</td>
<td>3 hours</td>
</tr>
</tbody>
</table>

- Different forms
- Job order slip
- Tools and materials requisition slip
- Borrower’s slip
- Requisition procedures
- Use of hand tools

- Written test
- Performance test

### Content Standard
- OSHC workplace regulations
- Inventory of tools and equipment
- Tools and equipment handling
- Tool safe-keeping/storage

### Performance Standard
- 1. Inventory of tools, instruments, and equipment are conducted and recorded as per company practices.
- 2. Tools are inspected and replaced after use.
- 3. Tools and equipment are stored safely in accordance with manufacturer’s specifications or company procedures.

### Learning Competencies
- LO3. Store tools and equipment.

### Project/ Activities
- 1. Applying proper storing of tools.

### Assessment
- Written test
- Performance test

### Duration
2 hours
## LESSON 3: PERFORM MENSURATION AND CALCULATION

**Demonstrate understanding of/on:**

- Measuring instruments and tools
- Proper handling of measuring instruments

<tr>
<td>• Drawing symbols and signs</td>
<td>1. Signs, symbols, and data are identified according to job specifications. 2. Signs, symbols, and data are determined according to classification or appropriateness in drawing.</td>
<td>LO1. Analyze signs, symbols, and data.</td>
<td>1. Drawing and describing the different signs and symbols used in the project plans.</td>
<td>• Written test  • Performance test</td>
<td>4 hours</td>
</tr>
</tbody>
</table>
| • Basic technical drawing  
• Technical plans and schematic diagram | 1. Necessary tools, materials, and equipment are identified according to the plan. 2. Components, assemblies or object are recognized as per job requirement. 3. Dimensions and specifications are identified according to job requirements. | LO2. Interpret technical drawings and plans. | 1. Explaining the specific uses of lines in the drawing. | • Performance test  • Written test | 2 hours |
| • Correct freehand sketching | 4. Correct freehand sketching is produced in accordance with the job requirements | LO3. Apply freehand sketching | 2. Demonstrating freehand sketching | • Performance test  • Written test | |
### LESSON 5: PRACTICING OCCUPATIONAL HEALTH AND SAFETY PROCEDURES

**Demonstrate understanding of:**

- Hazards and risks identification and control
- Organizational safety and health protocol
- Threshold limit value (TLV)
- OHS indicators
